# Mines and Prospects--Furnaces and Mills

# Running Lines for Alta Tramway

Will Extend a Distance of Five Miles From Continental Mines to

The survey for the long aerial tram over which the milling ores of the Continental mines at Alta will pass to the concentrator in Tanner's Flat is now progress and with characteristic diligence the raising of the towers will follow next week, said Manager Crowther, who returned from camp yesterday. The tramway, which will span a distance of nearly five miles in its stretch between the properties and the stretch between the properties and the plant, will be the longest in the State, and not only shall it be made to serve the requirements of the Continental company itself, but the needs of the neighbors and those who shall make connection with it at intermediate sta-tions. As a means of transportation at Alta its significance is greater, in-deed than anything that has been unat Alta its significance is greater, in-deed than anything that has been un-dertaken, as it will span the interval between the summit and the flat, which is annually swept by snowslides, and during which period a camp of con-stantly increasing wealth has been iso-lated. The management of the Conti-nental feels that it is possible under energetic endeavor to complete the nental feels that it is possible under energetic endeavor to complete the tram in ninety days. At all events ef-fort will be made to demonstrate that it can be done within that period.

Meanwhile the survey for the power-line has been completed with orders for over 4000 feet of pipe to be placed imover 4000 feet of pipe to be placed immediately, while at the milisite all the lumber is on the ground, as is the metallic roofing, the management expecting to have the plant under cover in the next ten days. In the achievement of all that has been projected in the plan of equipment the management is prepared to expend not less than prepared to expend not less than \$125,000, this alone a splendid expres-sion of confidence not only in the endurance of the company's own re-sources, but in those of the entire

## AT GALENA KING.

## New Ore Body in Stockton Property a Powerful One.

Upon the new channel of ore recently opened up by the management of the Galena King, Stockton, the drift has now extended for a distance of more than 100 feet, the cross-cuts which have been made upon it revealing a width of at least eighteen feet with every pound of the rock coming to the smelter. The development is one of the nost remarkable that has been recorded in the old comp in many years, and while there are more powerful demon-strations of the camp's great wealth, they are in localities where develop-ment has been more extensive. To in-tercept the channel 100 feet below the present stope the 900-foot level is now below extended. To recent a channel being extended. To reopen a channel on the east, which was productive of much wealth at the surface a croescut is now being extended from the 300-foot station in the incline, and that results there will be equally satisfactory the management has no doubt whatever. Meanwhile the ores from the west channel are netting the company about \$1200 per carload, and of which ore three cars are now at the sampler.

# AT COMSTOCK MILL.

## Plant Is Again in Active Operation and Product Coming.

City, says: The Comstock mill was started up this week and it is putting through concentrate worth \$35 to \$40 per ton. Only about twelve tons per day are put

Only about twelve tons per day are put through at present, as the ore has to be hoisted by hand, but as soon as the steam hoist is running they will naturally increase the output.

Manager D. B. Turner returned Tuesday from his five-months' visit to Scotland and the East. He stated that money is difficult to get for Western investment just now, and it took him longer to raise the necessary amount for the development of the West Quincy than it otherwise would, but he was successful and development work will be proceeded with as rapidly as possible.

work will be proceeded with as rapidly as possible.

Word received from Manager West, who has charge of the property of the Park City Co-operative Mining and Development company near Croyden, in Echo canyon, coveys some encouracing information. Work is being pushed steadily on the tunnel, which is making for a point about \$90 feet below the crown of the mountain. The tunnel is following the yein proper, and at every shot traces of copper are brought down. When depth has been obtained there is little doubt but what a big body of low-grade copper will be found.

# CAME FROM DUGWAY.

## Much Lead and Copper Ore Exposed in Deep Creek Camp.

Having completed his examination of properties and prospects at Dugway, in the Deep Creek country, George Z. Edwards, the expert mining man and for so many years the general superintendent of Con. Mercur, came in from that region yesterday to report to his clients. With transportation, Dugway ought to be made very productive, said Mr. Edwards, and to get that he sug-gests more systematic work on the properties. He found many exposures of lead running, it is claimed, quite well up in silver, and not a little copper in the locality. What the railway builder exacts, however, is proof of tennage, as well as permanence, and as soon as these exactions are compiled with he has no doubt that a read plied with he has no doubt that a road will be pushed into Dugway and its neighboring camps.

# READ IT! READ IT! READ IT!

# The Semi-Weekly.

Those people living away from the railroads in the Rocky mountains and at great distances from Utah throughout the United States, who are interested in the exciting and history-making, anti-church domination cam-paign now under way in Mormon lands, should subscribe for The Salt Lake Semi-Weekly Tribune, at \$1.50 per year in advance.

## DAY ON 'CHANGE.

## Week Begins With the Market Exhibiting Increased Strength.

The week on the mining exchange op-

ned with the sale of 18,350 shares stock for \$2114.63, and with the market perceptibly strengthened, notwithstanding the lack of star performers. May Day was the more active among the traders and sold readily around 7 cents, with the shorts finding plenty of takers up to 74c, while Uncle Sam, that had been crippled in the fire, rallied on good reports from its ledges and closed on transfers at 194c. Sacramento was strong and in good demand around 144c, with Carlsa maintaining a firm stand at 54c, while Columbus Con, with which the talent had been taking some liberties, sprinted to \$1.35c, with Yankee Conchanging hands at 34c. In the spairing Daly West was bid up to \$1.50, with \$4 bid for Grand Central and \$1.20 for Horn Silver, while Victoria was again eagerly sought around \$1 and Mammoth at \$1.45c, the day closing on the following market. Day was the more active among the

In the metal market silver ruled at 57% cents an ounce, lead at \$3.50%4.20 per hundred pounds and casting copper at 12 cents a pound.

# New High Level in Boston.

Special to The Tribune.

BOSTON Mass. Sept. 26.—The activity that started in the copper shares late last week was continued through today. Prices for the various active issues were decidedly strong many issues reaching a new high level for the recent advance. The leaders were almost neglected and fatied to reflect the activity and strength of the balance of the list. The tone is good, but traders are inclined to take profits. This caused a slight reaction in the late afternoon, but final prices were above those of Saturday. Hornblower & Weeks, brokers, 53 State street, Boston, and 10 Wall street, New York, furnish the following quotations. Special to The Tribune.

# Mammoth Group To Have Smelter

Management of the U. S. Company Directed to Proceed at Once With Equipments.

With the equipment of the Mammoth group of copper and gold-bearing mines in Sharta county, Cel., which is characterized by those who have made an inventory of its resources as an asset prospectively, as big as any about which the United States Mining company of Utah has wound its selfish embrace, the management will proceed at once. To that end Albert F Holden, the com-pany's managing director, who came in from the North again yesterday morn-ing, will leave for the company's latest sequisition next week, accompanied by George K. Fischer, the company's me-chanical engineer, and Frederick Lyon, Its chief engineer. A site selected, the management will, without delay, proceed with the construction of a smeller which shall enable it to reduce 500 tons of ore daily, while to economically move this output between the mines and smelter a tramway three miles in length will be constructed. The smelter will be not unlike those now operating in will be constructed. The smeater will be not unlike those now operating in Sait Lake valley with pyritic methods to prevail and with the product to con-sist of pig copper, such as issues from the valley plants. The work dispatched in a manner that has characterized the management of the United States com-pany is the local undertakings, it should pany in its local undertakings, it should begin to add to its earnings the wealth of its California acquisition, over which

there has long been so much rivalry, less than a year hence.

Mr. Holden, of whom an expression on the mines and their merits was sought on his return to town yesterday. while refusing, positively, to go into details or to divulge the contents of re-ports made by him and others long before it was conceived that the Mammoth fore it was conceived that the Mammoth would be added to the United States company's estate, said that the purchasing company's earnings would, no doubt, be vastly increased. More than this, Mr. Holden declined to say.

Local interests in the same region, including the owners of the Balakilala group of mines, that are to soon be provided with similar equipment, do not

vided with similar equipment, do not newitate to discuss the Mammoth as one of the leviathans of that locality the metallic contents of its ores, that oc-cur in large volume, exceeding the ave-rage in a district from which many millions are pouring annually. It looks as if interests in the United States Mining company had earned another shower of congratulations, although Utah will decline to believe its Western acquisition any greater than those It possesses in this State.

Good Words on Bingham. Discussing the Utah list of stocks on the Boston market, Corey, Milliken & Co., in

The stock market during the month, has amply justified our prediction that Utah Consolidated when selling at \$30 would pass to much higher figures. While we believe that Utah has not yet seen its best prices, we would like to call the attention of our clients to Bingham Consolidated, an adjoining property, which is destined to make a name for

which is described itself.

"The Eingham Con is earning today, from three stacks in operation at the smelter, about 1000 per day net. The statement that dividends may be expected statement that dividends may be expected. statement that dividends may be expected this year is without foundation, as the management is determined to make its treasury striong in cash before making any disbursements to stockholders. It has recently sold \$1,000,000 of 6 per cent convertible bonds at a good price, the proceeds of which have been expended in the purchase of valuable properties whereby the company is independently situated, so far as relates to the supplies of silicious ores.

far as relates to the supplies of the ores.

"The Bingham copper camp is just in its infancy and there are many well-located properties in that district which are destined to become factors in the American production of copper. The Bingham has a capable, conservative business-like management and has not fully responded to the recent general improvement in the copper share market. It is due for a rise."

# UNCLE SAM'S LOSS.

## President of Company Confident Damage Will Not Exceed \$3500.

President John Dern, who has been making an inventory of losses incurred by the recent fire at the Uncle Sam of Tintle, came up from camp again yesterday morning with the comforting assurance that certainly they will not exceed \$3500. To rehabilitate the engine but \$200 will be required, while the bollers have been but slightly damaged. It will not be necessary to retimber more than 135 feet of the shaft, while the building and all repairs should be completed within thirty days. His findings were submitted to the directors at a meeting during the after-noon, and with their concurrence the work will be dispatched.

Meanwhile the concentrator is being supplied with ores from the Crandail level and the dump, while the lessees have been recording the most gratifying discoveries in Humbug ground. While the damage by fire is regretted by President Dern, he appreciates the tenescool condition under ground. improved condition under ground.

# Did It at a Cost of Nearly \$300,000

First Unit in the Copper Company's Plant Now Completed With Others to Follow.

At a cost of \$300,000 the first unit in the equipment of the Utah Copper company's stupendous enterprise at Bingham has now been perfected, said Manager D. C. Jackling on his arrival from the mill in Bingham canyon yesterday morning, work on the remainder to be inaugurated next spring, when five of the capacity of the present will be added. With these additional units the plant in Bingham canyon, which has done so much to emphasize the resources of the great camp of copper, the company will have been equipped for the reduction of approximately 4000 tons of ore daily, the auxiliary concentrator to be at a point this side of the lake, where water rights that will enable the company to reduce 3000 tons daily have been acquired. As planned by the management the plant, day morning, work on the remainder planned by the management the plant, with the additional units, will be a most imposing structure. To the present battery of Wilfley tables will have been added at least 200 to the battery of vanners no fewer than 300—a stupendous proposition. pendous proposition

With the present unit Manager Jack-ling says he has no doubt that Super-intendent Janney will in October show a reduction of 18,000 tons of ore, with over thirty carloads of concentrates, the metallic contents of which are among the most astonishing features of the remarkable campaign on the copper-bearing zone at Bingham. The comand the experienced gentlemen onstituting its staff are to be congratconstituting its staff are to be congrat-ulated upon the splendid results achieved in so short a time Certainly no undertaking has done more to ac-centuate the merits of Bingham.

## TO INSTALL NEW MILL

### Will Handle Custom Ore for Treatment as Well as Company's Ore.

Special to The Tribune.

CALIENTE, Nev., Sept. 26.-The new tunnel of the Blue Bird, one of the Caliente Gold Mining company's claims, locatgold ledge, cross-cut for twelve feet in gold ledge, cross-cut for twelve feet in the old shaft. It is understood that a ralli will be installed at the mine early next year, which will not only handle the output of the company's mine, but also take custom ore for treatment. This means the beginning of a new and prosperous era in mining for not only Callente but all the free gold mines west of here as far as the State line of Nevada.

Charles Fenner locator and part own-

Charles Fenner locator and part owner of the Last Chance claim, forty-six miles northwest of Callente, reports having struck a twenty-six foot ledge of very rich silver-lead ore last week, carrying values in native silver and lead carbonates. Samples have today been sent to Salt Lake City for assay.

Joe Bullock, half owner of the Never-Sweat gold-silver claim, twenty-eight miles north of Moapa, has forty tone of 58.50 ore sacked and ready for shipment. He has 210 fest of shafts and a 300 foot tunnel completed on four feet of ore.

Hyams and Troy, San Francisco capitalists who employed Pete Loveland, an experienced prospector, to look up locations slong the Colorado and Virgin rivers last May, have bought out Loveland's interests in the Mayflower group of gold claims on Virgin river for \$5,000.

Jerry Whitcomb and Ed Findiay, own-Jerry Whitcomb and Ed Findiny, owners of the Cuban group of gold-sliver claims, north of Mospa, have received returns from samples sent to Sait Lake last week for assay of 18 gold and 140 ounces sliver per ton, the ore having been taken from a three and a half foot ledge cross cut in a 180 foot tunnel at a depth of about 100 feet.

# WATERS RECEDING.

### Albion Ore Bodies Being Rapidly Released From Element.

The old Wellington shaft on the properties of the Albion Mining company at Alta, from which so much wealth was raised in former days, is being was raised in former days, is being rapidly unwatered, said Alex Colbath, superintendent of the Quincy, who was down from camp during the day, and in very short time the extraction of ore from long submerged bodies should be resumed. As is well known to many there was a large amount of ore exposed in that territory that the pumping of water rendered unprofitable. ing of water rendered unprofitable, and to drain these the company de-cided on the long tunnel through which the waters are now gushing. At the Emma and Flagstaff work has

been suspended, although the tunnel was cleaned out and some retimbering done under the contract with the own-

ditions underground at the Alta Quincy, which has been temporarily deprived of power owing to a slight accident at the Columbus Con's plant, from which it is derived under contract.

# AROUND OLD WARREN.

## Sale of the O. K. Group-Work by El Frieda Company.

John Downsli, president, and Walter Dudley, superintedent of El Frieda Mining company, whose properties are twelve miles northwest of Warren, arrived twelve miles northwest of Warren, arrived in the city Tuesday afternoon from the mines. The gentlemen came out to purchase necessary supplies, etc., to enable them to push operations all winter long, says the Signal of Welser Ida. Mr. Downall states that work will be carried on all winter. As soon as Superintendent Dudley returns to the mines and necessary arrangements are completed, work will be vigorously prosecuted in the tunnel and crosscutting.

Mr. Downall states that the O. K. group, which is located near El Frieda property, and owned by a man named Allen, has been bonded to Warren parties for \$5000 with a payment of \$1000 down. By the terms of the bond \$300 must be expended per month in development for a period of two years. The tunnel is now in 250 feet, which shows up a spiendid ledge of free-milling ore, running \$11 per ton all through. The lessees will prosecute operations in the tunnel and run crosscuts.

rations in the tunnel and run
